– conductivity, apparatus for measurement of samples of low cross-sections 279
Thermal decomposition of alkaline earth tris(oxalato) ferrates(III) 1083
– – of basic iron(II) sulphate deptahydrates 553
– – of binuclear copper(II)-urea complex 1153
– – of bis-(DL-valinato)copper(II) 667
– – of bis-(DL-methioninato)copper(II) 667
– – of caesiumiodobismuthate 605
– – of chromia catalyst precursors 825
– – of copper(II) benzenetricarboxylates 961
– – of copper-indium selenide 589
– – of copper(II) ethylenediamine thicyanato complexes 1143
– – of copper(II)-ethylene glycol-sulphate complexes 1171
– – of dicitratoborates 351
– – of dioxime complexes 285
– – of dithiocarabamato complexes 387
– – of double dimethylammonium sulphates 1049
– – of estradiol monovalerate 1263
– – of estriol 1263
– –, of 4-ethylphenylamino-N,N-diacetato compounds 1297
– – of homobinuclear iron(III) complexes 447
– – of iron(III) phtalates 1007
– – of lanthanide 3-hydroxybenzoates 1037
– – of light lanthanide thioglycolates 325
– – of lithium-indium selenide 589
– –, – – telluride 589
– – kinetics of, shale 581
– – – of Th(IV) chelates of naphtol dyes 883
– – of magnesium peroxoborate 523
– – of nickel(pyridine)chloride 845
– – nickel(II)thioureachloride complexes 407
– – of palladium acetate 1231
– – of shales, kinetics of 805
– – of transition metal polyacrylates 1017
– – of trioctylamine chloro complexes 653
– – of trioxolatocobaltates 7
– – of zinc-iron complex cyanides 157
– degradation of fluorocarbon elastomers 955
– – mass spectrometry of nickel(II)thiourea chloride complexes 418
– dehydration of nickel aluminium hydroxy sulphate 633
– properties of hydrated thallium(I) diborates 125
– stability of base oils 747
– – of N-N-dialkylaminoazobenzene amide derivatives 297
– – of poly(β-bromostyrene) and copolymers 239
– –, of trioxalatocobaltetes 7
– –, of vanadia-molybdena catalysts 761
– – of vitamin B_{16} coenzyme model complexes 49
– – of V_6O_{13} 1243
– – of Zr(IV) asopyrazolonic derivatives 261

– transformations of lithium phosphates 897
Thermochemical studies on alkalichloride/cerium(III) chloride systems 1309
Thermodesorption of monochlorinated phenol 1126
Thermo-dielectric analysis of zeolites 517
Thermoelectrometry, applicatiors to metal-ion modified polyimide films 1131
Thermometry, for study of acidbase equilibria of succinediamidoxime 931
Thermogravimetry, and adsorption of water on silica gel 913
–, of barium hydroxide hydrates 89
–, of 2-benzylamino-2-deoxyheptonic acids 247
–, of binuclear copper(II)-urea complex 1155
–, of cadmium hydrogenhexavanadate 338
–, of caesiumiodobismuthate 606
–, of calcium carbonate fine powder 401
–, of chloro complexes of trioctylamine 655
–, of chromia precursors 827
–, of collidinium decatungstate with dimethylformamide 346
–, of complex zinc-iron cyanides 158
–, of copper indium selenide 591
–, of copper(II) ethylenediamine thiocyanato complexes 1144
–,– -ethylene glycol-sulphate complexes 1175
–, of $[Co(NCS)_2(amine)_2]$ type complexes 1029
–, of dicitratoborates 356
–, of dioxime complexes 289
–, of dithiocarbamato complexes 387
–, of double dimethylammonium sulphates 1051
– and DSC, comparison for kinetic analysis of complex reactions 1253
–, of 4-ethylphenylamino-N,N-diacetato compounds 1292
–, of fluorocarbon elastomers 956
–, of freeze-dried biological products 643
–, of heavy crude oils 255
– of homobinuclear dihalide-bridged iron(III) complexes 449
–, of iron(III) binuclear complexes 542
–,– phtalates 1012
–, of lanthanide 3-hydroxybenzoates 1039
–,– thioglycolates 326
–, of lithium indium selenide 592
–,– – telluride 593
–,– intercalated non-stoichiometric V_6O_{13} 1248
–,– phosphate mixtures 902
–, magnesium peroxoborate 525
–, of magnetic coating ink 1098
–, of mixed isomorphous oxalates 1303
–, of monoazo dyes with amide groups 300
–, of nickel(pyridine)chloride 846
–, of 5-nitrosopyrimidine derivative complexes 364, 576
–, of oil-shales 614
–, of palladium acetate 1232
–, of poly(β-bromostyrene) and copolymers 242
–, of polyurethane foam 855

–, of pyrite, effect of particle size 147
–, of reaction between copper(I) sulphide and copper(II) sulphate 779
–, of rubidium oxomolybdenum(VI) oxalate 371
–, of sodium hydrogenhexavanadate 334
–, of synthetic zeolites 35
–, of tetrakis-(8-hydroxyquinolinato)thorium(IV) adducts 625
–, of thallium(I) diborate hydrates 126
–, of thiourea chloride complexes 413
–, of thorium(IV) chelates of naphtol dyes 884
–, of transition metal polyacrylates 1020
–, of trioxalatocobaltates 10
–, of vanadia-molybdena catalysts 766
–, of vitamin B_{12} coenzyme model complexes 51
–, of zirconium(IV) azopyrazolonic derivatives 263
Thiodiglycolates, of light lanthanides, thermal decomposition 325
Thorium(IV) chelates of naphtol dyes, thermal decomposition kinetics 883
– tetrakis(8-hydroxyquinolinate) adducts, thermal behaviour of 621
Transition metal polyacrylates, thermal decomposition 1017
Trioctylamine chloro complexes, thermal decomposition of 653
Trioxalatocobaltates, thermal stabilities of 7

Urea, binuclear complex with copper(II), thermal decomposition 1153

Vaccines, freeze-dried, moisture determination in 647
Vanadates of trivalent metals, DTA 120
Vanadia-molybdena catalysts, thermal stability of 761
Vanadium oxide, lithium intercalated, thermal stability of 1243
Variable temperature electrical resistivity measurement system 1133
Vitamin B_{12} coenzyme model complexes, thermal stability of 51

Water determination, with TG of oil-shales 614
Water, adsorption and desorption on silica gel 911

X-ray diffraction, determination of dimensions of Cu_2O crystals with 785
– – spectra, of copper-aluminium alloys 562
– – –, of copper(II)ethylene glycol-sulphate single crystals 1178
– – –, iron(III) phtalates 1013
– – –, of lithium phosphate mixtures 901
– – –, of nickel aluminium hydroxysulphate 635
– – –, of nickel(pyridine)chlorides 848
– – –, of phases of Cu-Al and Cu-Zn-Al alloys 1282
– – –, of residues of chloro complexes of trioctylamine 661
– – –, of rubidium dimolybdate 373
– – – of synthetic zeolites 35
– – –, of thermal decomposition products of chromia precursors 829
– – –, – – – of NH_4VO_3 1245
– – –, of trioxalatocobaltates 9
– – –, of vanadia-molybdena catalysts 768

Zeolites, dielectric-differential analysis of 45
–, synthetic, thermal characteristics of 33
–, thermo-dielectric analysis of 517
Zirconium azopyrazolonic derivatives, thermal stability of 261
Zirconium(IV) reagents, thermal stability of 261
